SUMMARY

I am a front-end developer with a strong background in HTML, CSS, and JavaScript. I have extensive experience working with modern frameworks like Angular, React, and Next.js to build dynamic and responsive web applications. I excel in UI development, creating visually appealing and userfriendly interfaces. Additionally, I have experience working with Supabase and have set up Keycloak for authentication and authorization solutions. I'm passionate about crafting intuitive user experiences and continuously improving my skills in the latest front-end technologies.

SKILLS

Technical Skills

- **Programming Languages** : JavaScript, TypeScript, C++
- **Framework & Library** : React Js, Next Js, Angular, Node Js, Feathers Js
- **Technologies** : HTML, CSS, SCSS, MongoDB, TailwindCss, Bootstrap, Supabase
- **Tools** : Git, Github, GitLab, Bitbucket, Jira

Soft Skills : Leadership, Communication, Problem Solving, Logical Thinking, Self Learning.

WORK EXPERIENCE

Sumeru Software Solutions
Junior Developer
15th MAY 2023 - PRESENT

- Designed and implemented reusable, highly efficient components to streamline workflows and reduce development effort across multiple projects.
- Successfully managed and delivered a single module, named 'Segmentation,' requiring recursive modals to dynamically render components based on user inputs, ensuring seamless functionality.
- Led the implementation of Keycloak for authentication and authorization, creating a custom theme using Keycloakify tailored to React as the primary framework across the project.
- Guided some of interns on various modules, ensuring timely delivery while maintaining code quality and best practices.
- Contributed to two highly complex administrative projects, effectively managing workflows and UI designs derived from 600-700 Figma screens.
- Proactively designed and built a library of common components from scratch, accelerating product development and maintaining consistency across projects.
- Worked closely with Business Analysts to identify edge cases, optimize user flows, and ensure the delivery of high-quality, user-friendly products.
- Contributed to the Payment Gateways team by integrating Caps-UI and enhancing the associated npm package, ensuring robust and scalable solutions for global payment preferences.

Alore Growth OS
Frontend Engineer

- Designed and developed Angular components for integration across multiple products.
- Created comprehensive CSS library from ground up to standardize styling.
- Engineered complete Gmail structure with API integration for ongoing product development.
- Facilitated regular discussions with backend team to optimize API deployment.
- Developed website features to enhance user experience.
- Executed coding and debugging tasks to support various projects.
- Constructed flowcharts to illustrate different workflows.
- Mentored junior developers, addressing queries and promoting skill development.
